Explanation of the Typing Test

The Typing Test (TYPING-AT 06) is designed to evaluate a person's capacity to type a text with precision and speed within a timed period. It permits a fair estimate of a person's capacity to seize a great number of data without any errors. The report presents various results with regards to the typing capacity, such as the number of errors, the percentage of precision as well as the number of characters and words typed per hour.

Results obtained

<input type="checkbox"/> Duration of test in minutes:	00:00
<input type="checkbox"/> Total number of words typed:	0
<input type="checkbox"/> Total number of errors:	0
<input type="checkbox"/> Accuracy percentage:	0%

	Words / minute	Characters / hour
<input type="checkbox"/> Gross typing speed:	0	0

The gross typing speed corresponds to the number of words typed per minute without taking errors into account. Is also shown as the number of characters typed per hour.

<input type="checkbox"/> Net typing speed :	0	0
--	----------	----------

The net typing speed corresponds to the number of words correctly typed per minute. Is also shown as the number of characters typed per hour.
